COUGAR
CUTTING TOOLS

SPECIAL PRECISION SOLID CARBIDE ROTARY CUTTING TOOLS

Every order is bar coded and tracked by our patented real-time software. Our 98% on-time delivery rate doesn't happen by accident.

Service

When asked recently to explain the essence of Cougar Cutting Tools, we replied, "We take our work and our tools very seriously . . . our entire operation was developed to satisfy our customers."

At Cougar Cutting Tools, Inc., we have continually addressed our customers' needs by applying advanced technology, as well as common sense, to our manufacturing and processing procedures.

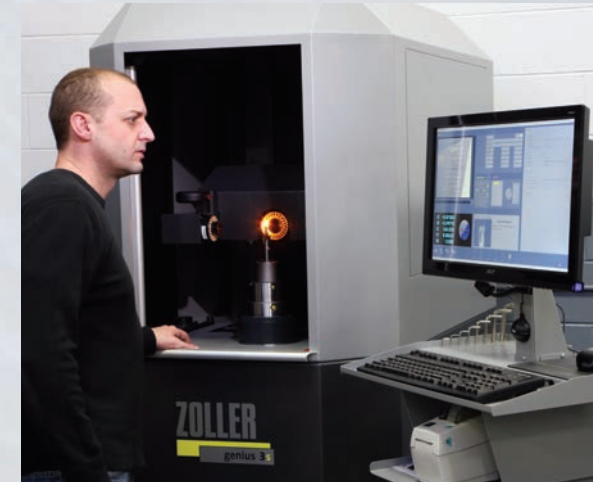

From first contact, our customers experience our commitment to service and quality. As part of that commitment, Cougar has developed custom manufacturing and service software that allows us to answer your questions immediately. We can quote, schedule, track or respond to any question you have instantly—no more voice mail phone tag. You get accurate answers now.

This software also allows us to maintain delivery schedules that are typically twice as fast as our competitors. We can even deliver as quickly as the next day, when required, with a reasonable premium charge.

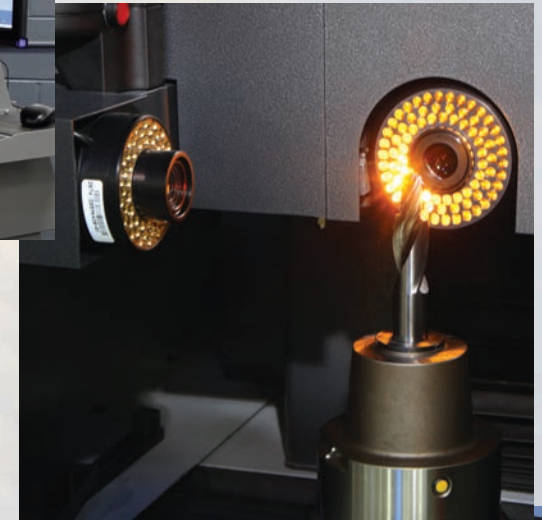

Numerous complex tool grinding calculations being performed by the 7-axis ANCA CNC tool grinder.

The Walters power CNC tool grinder probes a tool before grinding.

A 5-axis Zoller Automatic Measuring Machine precisely checks to validate that tools meet exact specifications.

Quality

Your special tools are precision manufactured to your blueprints on our state-of-the-art CNC equipment. Our toolmakers are trained to Cougar's stringent quality standards, making sure you get the quality tool you require. Our certification to ISO 9001 standards reflects our commitment to quality.

Since 1987, companies in the automotive, appliance, aircraft, aerospace and agricultural industries have benefitted from working with Cougar. You can too. Call (586) 469-1310.

Digital optical inspection systems ensure our tools are within specified tolerances.

Laser marking each and every tool ensures tool numbers remain indelible and readable for the life of the tool.
